

## Afternoon Simulation

- Please ensure the candidates are aware of the aims at the beginning of each session
- The feedback should focus on the human factors

### Aims

1. Putting into practice an RSI, difficult airway and can't intubate/ can't ventilate situation
2. Human factors
3. Practical issues

### Equipment

Sim man with iv cannula in situ

Syringes (20ml, 10ml and 5ml)

Needles for drawing up

Drugs or water/ N.saline (depending on the level of fidelity of the Sim man, access to drugs and local protocol)

ETT x2

Bougie

Gel

Suction

10ml syringe

Scissors

Face mask

Waters circuit

Guedel airways

Tie

Monitoring, including capnography

Copy of B@EASE checklist

Copy of difficult airway algorithms
