

SAMI

Morning Simulation

- Please ensure the candidates are aware of the aims at the beginning of each session
- Remember the morning simulation is a straightforward RSI, the feedback should focus on practical issues rather than human factors.

Aims

1. Experience of the simulation environment
2. Location of equipment
3. Performing an RSI using the B@EASE checklist

Equipment

Sim man with iv cannula and art line in situ

Syringes

Needles for drawing up

Drugs or water/ Normal saline (depending on the level of fidelity of the Sim man, access to drugs and local protocol)

ETT x2

Bougie

Gel

Suction

10ml syringe

Scissors

Face mask

Waters circuit

Guedel airways

Tie

Monitoring, including capnography

Copy of B@EASE checklist
